

3rd Genetic Counseling Pre-Conference Workshop
13th Asia Pacific Conference on Human Genetics

November 6, 2019
Makati Shangri-La Manila, Philippines

To register: www.apchg2019.org

Attendees:

- Genetic counselors and genetic counseling students
- Medical doctors, nurses and researchers interested in the practice of genetic counseling

Aims:

- 1) Advance the genetic counseling profession in the Asia region.
- 2) Provide education and enhance community engagement among genetic counseling practitioners.
- 3) Opportunity to engage with colleagues and obtain professional development for genetic counselors.

Objectives:

- 1) Illustrate the importance and complexities when empowering patients with a genetic condition and their families.
- 2) Describe the development of the genetic counseling profession across the globe.
- 3) Identify and integrate counseling techniques in challenging psychosocial genetic counseling sessions.
- 4) Understand the logistics when ordering genetic testing and the various components of a genetic test result.
- 5) Highlight genetic counselor led research and the role of a laboratory-based genetic counselor.
